

Natrium Capital Limited

10 Bloomsbury Way

London WC1A 2SL

NATRIUM CAPITAL LIMITED

Opportunity for 3rd year Chemistry or Chemical Engineering Masters students

8-week Internship – Summer 2026

Job Specification

Job title:

Chemicals M&A research analyst - intern

Salary:

£ Competitive

Company description:

[Natrium Capital Limited](#) provides [investment banking](#) services to the [Chemicals and Materials sectors](#). It specialises in delivering strategic corporate finance advice to the Chemicals – including speciality and fine chemicals – chemical distribution, engineering materials, and sustainable technology industries. The company's focus is on [mergers and acquisitions, divestments, and strategic advisory projects](#).

The Company is based in Bloomsbury in London, with strategic alliances in global locations. Natrium Capital has operated a very successful internship programme for over ten years, and several former interns have been offered full-time roles.

Job description:

The successful candidates will work in London for eight weeks during the summer vacation starting in June, July or August 2026, with an opportunity for permanent employment following graduation. The job involves supporting senior staff in a range of research, analytical and presentation preparation roles and working within the team to provide clients with high quality advice in a timely and efficient manner.

Our team is friendly and close-knit, and will draw on their wealth of knowledge and experience to provide you with all the support you need to gain the necessary skills to make a meaningful contribution to the day-to-day operation of the company. Our work is very varied and interesting and you will come away from the experience equipped with new skills and a 'hands on' appreciation of what a career in finance could really be like. You will learn about financial analysis and the chemical industry as well as a number of office skills. You will be shown what to look for in a company announcement and start to learn about valuation techniques.

Person Specification:

Are you a highly motivated individual with a keen interest in both finance and the Chemical industry and are you ready to learn? We are looking for two or three students in the 3rd year of a Masters' Degree in Chemistry or Chemical Engineering (or similar).

You should be able to demonstrate by your experiences, either at university or elsewhere, the following:

- Curiosity to learn about the Chemical industry in practice
- A keen interest in current affairs
- A commitment to acting with honesty and integrity

Candidates must also have the following:

- Exceptional numeracy skills. [This should be demonstrated by a minimum of a Grade A or A* in Mathematics at A Level and excellent marks in courses of continuing Mathematics education whilst at University.]
- Excellent computer skills in MS Word, Excel and PowerPoint
- Good interpersonal skills, including fluent written and spoken English
- Familiarity with video conferencing platforms, such as Zoom; Microsoft Teams
- Attention to detail
- UK passport or Right to work and Right to remain in the UK

How to apply:

Please email your CV and a covering letter to info@natriumcapital.com

The covering letter should explain your suitability for this role by setting out your knowledge of science and the chemical industry and why your personal qualities or experiences suit you to [a career in chemicals investment banking](#).

Please include the name and contact details of one referee who is able to comment on your academic standing (including any grades achieved at university) and general suitability for the role and a second referee who can comment on your character, honesty and integrity.

Natrium Capital is an equal opportunities employer.

Applications close on **Sunday 22nd March 2026**.
